The Dean, College of Natural and Applied Sciences

The Bells University of Technology

Dear Sir/Madam,

**APPLICATION FOR THE POSITION OF LECTURER II IN COMPUTER SCIENCE AND
INFORMATION TECHNOLOGY**

I am writing to formally apply for the position of *Lecturer II* in the Department of Computer Science and Information Technology at The Bells University of Technology.

I hold a PhD in ICT Education with a specialization in Artificial Intelligence from the world bank sponsored Africa Center of Excellence for Innovative and Transformative STEM Education (ACEITSE), Lagos State University (LASU) under the supervision of Distinguished Emeritus Professor Peter Okebukola, OFR who was honoured by your reputable citadel of learning with an Honourary doctorate degree in your last convocation and Professor Jophus Anamuah-Mensah from the University of Education, Winneba, Ghana was my external examiner. My doctoral research centered on the development of a Learning Management System with AI solution named Technology-Education-Art (TEA) which is capable of automatically grading students drawings and its pedagogical impact on students' performance in visual arts and biological drawings, which aligns with emerging interdisciplinary approaches in STEAM education.

In addition to my PhD, I possess a Master's degree in Information Technology, a Master of Education in Educational Technology, Bachelors degree and a Higher National Diploma in Computer Science. I am also a certified software developer and hold credentials in cybersecurity, AI for teachers, .NET and Java programming from globally recognized institutions including Microsoft and Oracle. I am a member of National Association for Research in Science Teaching (NARST), Virginia USA and currently applying for the membership of Computer Professionals of Nigeria.

My teaching and professional journey spans over 15 years, including recent roles as course developer and programming instructor with TEA Learn (tealearn.org), and as a faculty member at institutions such as Daleware Institute of Technology and Timglobal Institute. I have designed and implemented numerous edtech solutions such as a digital classroom system and an AI-supported LMS, which have been integrated into educational settings.

Beyond my academic and professional qualifications, I have actively contributed to global conversations on technology in education through research publications and conference presentations in NARST, Association for the Advancement of Artificial Intelligence (AAAI), and other international bodies. I have also collaborated on AI-based cybersecurity projects and supervised student research projects applying culturally responsive teaching methods.

Given my background, passion for innovative teaching, and active engagement in computer science, educational technology and AI research, I am confident that I will be a valuable asset to your department.

Thank you for considering my application. I look forward to the opportunity to contribute to the growth and academic excellence of The Bells University of Technology.

Yours faithfully,
Dr. Benjamin Osondu Onuorah
